**S1**

DREAMSEEKERCARAVANS.COM.AU

**COMPACT  
TOYHAULER**

## EXHILARATION AND EXCITEMENT

After a day of riding you will look forward to returning to an environment like no other. The versatile living space makes the S1 one of the smartest designs on the market. Inside the S1 you get a clever space which functions as a sleeping, living & garage zone. The lounge & double bed both fold-away to allow for your toys. Also the table is removable which clears the way. The S1 sleeps three with the lounge converting into a single bed and the fold-down double bed or you can connect the two to create an extra large queen bed.

Apart from its visual appeal Dreamseeker have also made sure that the S1 is practical. They have included a combo cooker/sink, reverse-cycle air conditioner, 140ltr Waeco 12vlt fridge/freezer and combo shower/toilet.

The S1 also includes RGB strip lighting. Customers can match their LED lighting to their favourite colour or the colours of a particular racing team all with the click of a button. Genius!

Dreamseeker have designed and produced a very smart van with the S1. To power up this beast they have included a BMPRO 35 battery management system with a digital Trek Display, 2 x 170 watt solar panels and 2 x 100 amp deep-cycle batteries. All that's left to do is hook up and get on the road.

## SLEEK & SPORTY

It is undeniable that the S1 offers customers something new, exciting and impressive. The S1 is certainly made for an active life style with plenty of space to haul any of your toys along with you on your caravanning adventures. For strength and durability Dreamseeker designed this model with its intended purpose very much at the forefront of their minds.

The chassis is 4" throughout with a 6" a-frame. The ever-reliable and extensively tested Tuff Ride suspension offers an impressive ATM of 2.8T. A set of All Terrain Tyres come as standard with one spare cleverly mounted underneath the van. The frame is welded tube aluminum adding additional strength to S1.

The bold, dominating green Aluminium Composite exterior undoubtedly captures attention. The stylish Dreamseeker logo and branding really stands out and makes the S1 a visually stunning Toyhauler on the road.

For comfort and safety there is an electric step, reverse camera and three external LED lights as well as additional bar lights on the front and back. Dreamseeker have ensured they include plenty of external lighting for moving bikes and other items in and out of the van as required.

## FREEDOM AT YOUR FINGERTIPS

The Dreamseeker S1 offers customers an opportunity to experience the freedom of what we all know to be the ultimate outdoor lifestyle. Packed with features and crafted out of passion, the S1 captures the raw, exhilarating and adventurous side of caravanning with a rare and beautiful twist.
